Professional Summary

Business Analyst & Data Analytics aspirant with hands-on experience in data analysis, AI automation, and process-driven projects through industry externships and internships. Skilled in translating business problems into structured workflows, performing exploratory data analysis, and delivering actionable insights using Python, SQL, Power BI, and Excel. Motivated to contribute to data-driven decision-making in industrial AI environments.

Experience

Data Analytics & AI Automation Extern – *Outamation* | Present

Python | OCR | Document Processing | AI Automation

- Supported OCR-based document processing pipelines for large mortgage datasets.
- Assisted in extracting structured data using Python and PyMuPDF.
- Participated in workflow design and validation of AI automation outputs.
- Gained exposure to requirement analysis and evaluation of LLM-driven systems.

Data Analytics Extern – *TruBridge Healthcare*

Python | SQL | Power BI | Excel

- Analyzed diabetes healthcare datasets using Python and SQL to identify trends and inconsistencies.
- Reduced data quality issues by ~30% through preprocessing and transformation.
- Built Power BI dashboards to support operational decision-making.
- Converted raw data into visual insights for stakeholders.

AI Engineering Intern — *Wipro*

Python | Compliance Automation

- Contributed to AI-driven compliance monitoring aligned with GDPR, HIPAA, and ISO 27001.
- Integrated API-based querying systems to reduce manual review effort by 40%.
- Assisted in validating API-based workflows and documenting test observations.
- Collaborated in testing and debugging modules to improve system reliability.

AI Project Intern – *Infosys Springboard*

Python | NLP

- Built speech analysis pipelines for pronunciation and fluency assessment and verified output accuracy to be 75%.
- Implemented speech-to-text workflows and modular NLP components.
- Assisted in debugging and validating modular Python components.
- Strengthened understanding of SDLC and quality engineering practices.

Projects

Diabetes Risk Analysis | *Work-Based Analytics Project*

- Performed EDA on Kaggle diabetes dataset using Python.
- Analyzed glucose, BMI, and clinical indicators.
- Created visual dashboards to support risk assessment insights.
- *Analysis_Dashboard_Link*

Riya — AI Chatbot | *Hugging Face Transformers, Gradio*

- Developed a **text-and-voice chatbot** featuring persona-based dialogue and real-time text-to-speech

- Implemented conversational AI using transformer-based language models and Gradio for interactive UI.
- Improved user experience by refining dialogue logic and response handling.
- *GitHub Repository Link*

Automatic Music Generator | *Python, Deep Learning (LSTM)*

- Built an **AI music generation model** using **LSTM neural networks** to compose classical piano pieces
- Performed audio preprocessing and feature extraction for sequential model training.
- Tested generated outputs for consistency and quality.
- *GitHub Repository Link*

Technical Skills

Data & Analytics: Python, SQL, Power BI, Excel, Pandas, NumPy
Business Analysis: Requirements understanding, process mapping, data interpretation
AI/ML: Classification, Regression, NLP, Model Evaluation
Tools: Scikit-learn, TensorFlow, Git, GitHub, Jupyter
Cloud: AWS (EC2, S3)

Certifications

Data Analytics Externship - *TruBridge Healthcare – View Certificate*
Microsoft Excel Using AI Workshop - *OfficeMaster – View Certificate*
AI Powered Compliance Guardian - *Wipro Project Completion – View Certificate*
Artificial Intelligence - *Infosys Springboard - View Certificate*
Managing the Company of the Future *– Coursera (University of London) - View Certificate*
Google Data Analytics Professional Certificate – *Coursera (Ongoing)*

Competitions

NCIIPC Startup India AI Grand Challenge

Responsible AI for National Security: Developed **SecureCode AI** — an LLM-based, multi-language vulnerability detection system with context-aware flaw identification (SQLi, Buffer Overflow, Hard-coded Credentials) and CWE/CVE-mapped severity classification.

Education

JSS Science and Technology University, SJCE — **Nov 2022 – Jun 2026**
BE, Information Science and Engineering — CGPA: 9.05
Mysuru, Karnataka

New Baldwin Independent PU College — **May 2021 – Jun 2022**
II PUC – PCMC (Physics, Chemistry, Mathematics, CS) — Percentage: 90.83%
Bengaluru, Karnataka

New Baldwin International School — **Apr 2019 – Mar 2020**
10th with Science, Computer Applications, ICSE — Percentage: 92.67%
Bengaluru, Karnataka

Leadership & Activities

Volunteer, Linux Campus Club (LCC), SJCE – 2024 - Demonstrated technical projects during JSS Open Day and supported event coordination.

Interests

Data Analytics | Business Problem Solving | Artificial Intelligence | Creative Thinking | Poetry | Badminton
